# Muffler-Cast<sup>®</sup> Bandage Kit Technical Data Sheet

Rev 06/08

**PRODUCT DESCRIPTION:** Muffler-Cast<sup>®</sup> Bandage Repair Kit will resist the high heat of all exhaust systems and catalytic converters. Muffler-Cast<sup>®</sup> bonds to all metal surfaces and can be molded into cracks and seams.

**WORKS BEST ON:** mufflers, resonators, tailpipes and other exhaust components.

**PRODUCT FEATURES:**

Color: White

Water Resistant

Non-Flammable

Temperature Resistance: 350°F

Curing Time: Let set 1 hour. Full cure after 24 hours.

Note: temperature and humidity, gap and thickness of product applied affect the curing rate.

Chemical Solvent Resistance: water and oil

Storage: Store in a cool, dry environment in unopened container below 80°F

**SURFACE PREPARATION:** Exhaust system should be cold before repair is started. Thoroughly clean all surfaces of grease, oil, traces of paint, dust, etc.

**REMOVAL METHODS:**

Clean up excess with water prior to material drying. Thoroughly clean hands with soap and water.

**AFTER CURE:** Use mineral spirits.

**HELPFUL HINTS:** If product separates or settles during shipping, mix it as the liquid is the hardening agent; gently knead the tube, with cap on.

**See MSDS for more complete information, safe handling instructions and first aid.**

Non-Regulated

Part Numbers: 00155
