# Yellow Weather-strip Adhesive

## Technical Data Sheet

Rev 07/08

**PRODUCT DESCRIPTION:** A high-strength, yellow colored, fast drying, waterproof adhesive for bonding all types of weather-strip, gaskets and vinyl to metal. Yellow Weather-strip Adhesive is a contact-type cement for all types of weather-stripping. The maximum strength is reached after all the solvent has been released (within 24 hours).

**WORKS BEST ON:** Yellow Weather-strip Adhesive can be used to bond weather-stripping to various parts of cars and trunks like doors and trunks. Use on door and trunk moldings and all types of automotive weather-strip.

### PRODUCT FEATURES:

**Flammable! Keep away from heat sparks and open flame.**

Waterproof

Color: Yellow

Full Bond: The maximum strength will be attained after all the solvent has been evaporated; usually 24 hours.

Chemical Solvent Resistance: automotive fluids such as oil, grease and solvents.

Storage: Store in a cool, dry environment in unopened container between 50°F to 90°F. Keep out of direct sunlight.

**SURFACE PREPARATION:** Surfaces must be clean, free of dust and mold release from new weather-stripping.

### REMOVAL METHODS:

Before Cure: Scrape excess with a knife or non-flammable cleaning fluid while still wet.

After Cure: Wipe with an adhesive remover that is safe for automotive paint..

**HELPFUL HINTS:** Do not leave container inside an automobile or leave in direct sunlight.

Yellow Weather-strip should be applied in a thin even coating to both surfaces and allowed to dry (3 to 4 minutes) prior to bonding the two surfaces together. Apply enough pressure to produce uniform contact.

On non-porous surfaces, if assembled while the adhesive is still wet, will prevent the release of the solvent and the adhesive will take longer to dry and develop maximum strength.

**See MSDS for more complete information, safe handling instructions and first aid.**
